

New SmartTOP convertible top control for Ferrari 360 and F430 Spider now available

As of now the new SmartTOP convertible top control by the company Mods4cars is available for the Ferrari 360 and F430 Spider. It allows the top to be opened and closed while driving via One-Touch. A short press of the button activates the automatic top movement.

Las Vegas, Nevada – May 23, 2019

The new SmartTOP convertible top control by the company Mods4cars is now available for the Ferrari 360 and F430 Spider. The retrofit module makes it possible to open and close the convertibles top while driving at a speed of up to 40 km/h via One-Touch. All you need to do is tap the convertible tops interior button. The top movement is then carried out automatically.

"Our new module STAFFI1 is a revised version of the predecessor STAXFI1," explains PR spokesman Sven Tornow. "We have developed new hardware and an improved plug-and-play adapter. In addition, we were able to considerably reduce the price for the SmartTOP convertible top control," Sven Tornow continues.

The included new plug-and-play adapter ensures a simple connection between vehicle electronics and SmartTOP module. The installation is done by simply plugging together. Plugs used are in OEM quality. Since no wires are cut, a traceless dismantling is possible at any time.

All SmartTOP modules are equipped with a standard USB port. Thereby, the configuration can be easily done on a PC / Mac. In addition, the USB port allows the installation of software updates, which Mods4cars provides free of charge.

Since 2001 the company Mods4cars manufactures their SmartTOP convertible top controls. From Alfa, Audi, Bentley, BMW, Chevrolet, Ferrari, Ford, Infiniti, Jaguar, Lamborghini, Land Rover, Maserati, Mazda, McLaren, Mercedes-Benz, Mini, Nissan, Opel, Peugeot, Porsche, Renault, Volkswagen to Volvo. All popular convertible and roadster models are supported.

The comfort control for the Ferrari 360 and F430 Spider is available for 299,00 Euro + tax. SmartTOP convertible top modules are also available for the Ferrari California and the 458/488 Spider.

About Mods4cars:

Mods4cars was founded in 2002 from the idea to add a highly demanded feature to the otherwise almost perfect Porsche Boxster: Comfort One-Touch roof operation while driving at slow speeds. The resulting product offered not only that, but also allowed quick and easy installation by just swapping out a relay box, thus leaving no traces and no permanent changes on the vehicle. The first SmartTOP roof controller was born.

The success of their first products in Germany and Europe prompted them in late 2004 to move operations to the USA, to be able to serve the American market as well as all other English speaking countries such as Australia, UK and South Africa from one central location. Their business has grown to a full-fledged international corporation with an office in Las Vegas and a full line of innovative products as well as distributors and installation partners all over the globe.

Being highly specialized in the development and distribution of aftermarket roof- and comfort controllers since 2002 allows them to offer an unsurpassed level of competence and product quality. Their main goal is optimization of each individual product to a maximum in compatibility, usability and intuitive operation. They put greatest effort into development and quality checks of all their products to achieve this goal and meet all expectations of their customers.

The extraordinary success of their products is also based on the great communication with their customers, which usually already starts for each new product during the development and prototyping phase.
