

SmartTOP Convertible Top Controller for Audi A3, A4 and TT Roadster gets new and improved Plug-and-Play wiring harness

The SmartTOP convertible top add-on module offered by Mods4cars for Audi's A3, A4 and TT convertibles now ships with a new version of the plug-in-between wiring harness. This allows for an even easier and quicker installation of the top convenience add-on kit.

Ocean, New Jersey – July 19th, 2011

The SmartTOP convertible top module offered by Mods4cars for the Audi A3, A4 Convertible and the TT Roadster now comes with a new and improved version of the plug-in-between wiring harness. This version utilizes all genuine OEM parts for plugs and sockets, thereby allowing for an even easier, more convenient and foolproof installation. All plugs only fit one way and latch securely into place. Now anyone can install the kit quickly and easily to enjoy the benefits immediately.

“This new ‘ultra-plug-and-play’ wiring harness makes connecting our module to the vehicle electronics a matter of seconds.” Says PR manager Sven Tornow. “Now we are proud to offer OEM quality wiring with unprecedented quality. All plugs fit and latch perfectly.” He concludes.

The add-on kit allows opening and closing of the convertible top from afar via the factory key fob. Additionally the windows can be lowered or raised by remote, independently from the top. The original key fobs do not have to be reprogrammed or replaced. The kit also offers the ability to operate the top while driving at slow speeds, user programmable and up to 60kmh (~38mph) while adding one-touch convenience. It is no longer necessary to pull over and hold down the top switch. Drivers get more frequent top-down use of the car.

The module can also be programmed to not interrupt an ongoing top operation when either the ignition is turned on or off. Like on other modules offered by Mods4cars, all features and settings are user programmable and the entire module can be deactivated when needed. A standard USB port in conjunction with a support program available online allow for easy configuration and firmware updates (free of charge).

Not only Audi owners get to enjoy the benefits of the SmartTOP add-on: The kits are available for Alfa, Bentley, BMW, Ferrari, Ford, Infiniti, Mazda, Mercedes, Mini, Nissan, Opel, Peugeot, Porsche, Renault, Volvo and VW – Mods4cars now carries a SmartTOP module for almost every modern convertible on the road.

The top-down fun for A3, A4 and TT is available for 249 Euro + tax.

About Mods4cars:

Mods4cars was founded in 2002 with the idea to add a highly demanded feature to the otherwise almost perfect Porsche Boxster: Comfort One-Touch roof operation while driving at slow speeds. The resulting product offered not only that, but also allowed quick and easy installation by just swapping out a relay box, thus leaving no traces and no permanent changes on the vehicle. The first SmartTOP roof controller was born.

The success of their first products in Germany and Europe prompted them in late 2004 to move operations to the USA, to be able to serve the American market as well as all other English speaking countries such as Australia, UK and South Africa from one central location. Their business has grown to a full-fledged international corporation with an office in California and a full line of innovative products as well as distributors and installation partners all over the globe.

Being highly specialized in the development and distribution of aftermarket roof- and comfort controllers since 2002 allows them to offer an unsurpassed level of competence and product quality. Their main goal is optimization of each individual product to a maximum in compatibility, usability and intuitive operation. They put greatest effort into development and quality checks of all their products to achieve this goal and meet all expectations of their customers.

The extraordinary success of their products is also based on the great communication with their customers, which usually already starts for each new product during the development and prototyping phase.
