Convertible top one-touch operation while driving for Renault Megane CC

Available immediately, the SmartTOP retrofit convertible top controller offered by Mods4cars allows opening and closing of the top at the touch of a button and while driving.

Ocean, New Jersey - Nov. 10, 2010

The SmartTOP convertible top controller manufactured by Mods4cars offers more every day convenience to Renault Megane CC owners: Thanks to the SmartTOP controller it is possible to open and close the top while driving (up to 40km/h / 28 mph) with a mere tap on the top switch. No more pulling over and holding down the switch, allowing for drivers to enjoy their cars with the top down more often.

"Our retrofit convertible top controllers offer the kind of convenience and luxury you don't want to miss, once you've experienced it!", explains the company's PR-manager Sven Tornow. "This product has a lot to offer!", he concludes. It's different features can be programmed individually or the entire module turned off if needed.

The SmartTOP controller also adds one-touch comfort operation to the center console all-windows switch. Thanks to a standard USB port all configuration settings as well as (freely available) firmware updates can be done with any Windows PC or laptop.

The Renault Megane CC now joins the ranks of supported cars along with Alfa Romeo, Audi, Bentley, BMW, Ferrari, Ford, Mazda, Mercedes Benz, Mini, Opel, Peugeot, Porsche, Volvo and VW which are all brands Mod4cars offers a SmartTOP module for.

The top-down comfort add-on for Renault Megane CC is available immediately for Euro 249.00 excluding tax.

About Mods4cars:

Mods4cars was founded in 2002 with the idea to add a highly demanded feature to the otherwise almost perfect Porsche Boxster: Comfort One-Touch roof operation while driving at slow speeds. The resulting product offered not only that, but also allowed quick and easy installation by just swapping out a relay box, thus leaving no traces and no permanent changes on the vehicle. The first SmartTOP roof controller was born.

The success of their first products in Germany and Europe prompted them in late 2004 to move operations to the USA, to be able to serve the American market as well as all other English speaking countries such as Australia, UK and South Africa from one central location. Their business has grown to a full fledged international corporation with an office in California and a full line of innovative products as well as distributors and installation partners all over the globe.

Being highly specialized in the development and distribution of aftermarket roof- and comfort controllers since 2002 allows them to offer an unsurpassed level of competence and product quality. Their main goal is optimization of each individual product to a maximum in compatibility, usability and intuitive operation. They put greatest effort into development and quality checks of all their products to achieve this goal and meet all expectations of their customers.

The extraordinary success of their products is also based on the great communication with their customers, which usually already starts for each new product during the development and prototyping phase.
