

SmartTOP enables convertible top control via remote for all Peugeot CC models

The retrofitted SmartTOP convertible top control by the manufacturer, Mods4cars, allows the opening and closing of the top while driving with One-Touch for all Peugeot CC models. In addition, the top can be operated from a distance via the existing vehicle key.

Las Vegas, Nevada – March 21, 2019

SmartTOP additional convertible top control offers Peugeot 207 CC, 307 CC and 308 CC owners more comfort and functionality of their vehicles. The retrofitted module by Mods4cars makes it possible to open and close the convertibles top from a distance using the original vehicle key. Programming or modification of the vehicle key is not required for this function.

Thanks to the SmartTOP module, the convertible top can also be opened and closed while driving at a speed of up to 40 km/h. With the One-Touch function the need to stop the vehicle and the cumbersome holding down of the top button is eliminated. After a short press of the top button, movement of the top is automatically executed.

These two main functions ensure that the convertible is used open more often. Various other additional features also help simplify general use. "Our additional convertible top controls offer a comfort that, once experienced, you would not want to do without," explains PR spokesman Sven Tornow.

With it the vehicles windows can be opened and closed from outside via the original remote control. The All-Windows button within the interior, makes it possible to close all windows with One-Touch. In addition, operation of the windows is possible for up to 60 seconds after switching off the ignition. The top movement in progress is not interrupted by starting or stopping the engine. If necessary, the SmartTOP can be completely deactivated.

The convertible modules are individually programmable. Thanks to a setup menu, functions can be carried out via the cars display. With a standard USB port on the SmartTOP convertible module, connecting and configuring the device with the home PC is also made possible. In this way software updates can also be run, which are provided by Mods4cars free of charge.

A plug-and-play adapter, included in delivery, ensures quick and easy installation. The connection between the vehicle electronics and the SmartTOP module is thus made simply by plugging together. Adapters in original equipment quality guarantee a 100% accurate fit. No cables need to be cut.

SmartTOP modules for Peugeot 207 CC, 307 CC and 308 CC are available from 229,00 Euro + tax.

SmartTOP convertible modules are also available for the following vehicle brands: Alfa, Audi, Bentley, BMW, Chevrolet, Ferrari, Ford, Infiniti, Jaguar, Lamborghini, Land Rover, Maserati, Mazda, McLaren, Mercedes-Benz, Mini, Nissan, Opel, Peugeot, Porsche, Renault, Volkswagen and Volvo.

About Mods4cars:

Mods4cars was founded in 2002 from the idea to add a highly demanded feature to the otherwise almost perfect Porsche Boxster: Comfort One-Touch roof operation while driving at slow speeds. The resulting product offered not only that, but also allowed quick and easy installation by just swapping out a relay box, thus leaving no traces and no permanent changes on the vehicle. The first SmartTOP roof controller was born.

The success of their first products in Germany and Europe prompted them in late 2004 to move operations to the USA, to be able to serve the American market as well as all other English speaking countries such as Australia, UK and South Africa from one central location. Their business has grown to a full-fledged international corporation with an office in Las Vegas and a full line of innovative products as well as distributors and installation partners all over the globe.

Being highly specialized in the development and distribution of aftermarket roof- and comfort controllers since 2002 allows them to offer an unsurpassed level of competence and product quality. Their main goal is optimization of each individual product to a maximum in compatibility, usability and intuitive operation. They put greatest effort into development and quality checks of all their products to achieve this goal and meet all expectations of their customers.

The extraordinary success of their products is also based on the great communication with their customers, which usually already starts for each new product during the development and prototyping phase.
