

SmartTOP additional cabriolet top control for the new BMW Z4 available soon

The retrofitted SmartTOP cabriolet module by Mods4cars will soon also be available for the new BMW Z4 (G29). Among other things, it enables the convertibles top to be operated while driving with One-Touch. In addition, the top can be opened and closed from a distance using the existing vehicles key with just a touch of a button.

Las Vegas, Nevada – September 19, 2019

The manufacturer Mods4cars has announced the SmartTOP additional cabriolet top control for the new BMW Z4 (G29). The clever convertible module will be available before the end of this year. The SmartTOP module enables the convertibles top to be opened and closed while driving with One-Touch. The tedious continuous pressing on the tops button is thereby eliminated.

In addition to simpler convertible top operation from inside the vehicle, the top can also be opened and closed from a distance using the existing vehicles remote control with One-Touch. For this, a press on the button on the vehicles key is all that is needed. No changes to the vehicles remote control is required for this function.

The following additional functions will also be included: Windows can be opened and closed via the vehicles key. It will be possible to reverse the operating direction of the convertibles top button. The Valet Mode will prevent the convertibles top from being operated via the interior button and the remote control. This allows the top to be completely locked when a third party is using the vehicle.

"We are pleased that we will soon be able to offer our SmartTOP convertible module for the BMW Z4 (G29), which was presented a few months ago. Our customers will be able to enjoy the advantages of our sophisticated comfort modules as of the coming convertible season," explains PR spokesman Sven Tornow. "Also the installation of our latest product is child's play. A precision fitting adapter set ensures a simple plug-in connection between the vehicle electronics and the SmartTOP module," Sven Tornow continues.

SmartTOP convertible top controls are available for the following brands: Alfa, Audi, Bentley, BMW, Chevrolet, Ferrari, Ford, Infiniti, Jaguar, Lamborghini, Land Rover, Maserati, Mazda, McLaren, Mercedes-Benz, Mini, Nissan, Opel, Peugeot, Porsche, Renault, Volkswagen and Volvo. The following BMW models are also supported: BMW 1 Series, 3 Series, 4 Series and 6 Series Convertible as well as Z4 and Mini.

About Mods4cars:

Mods4cars was founded in 2002 from the idea to add a highly demanded feature to the otherwise almost perfect Porsche Boxster: Comfort One-Touch roof operation while driving at slow speeds. The resulting product offered not only that, but also allowed quick and easy installation by just swapping out a relay box, thus leaving no traces and no permanent changes on the vehicle. The first SmartTOP roof controller was born.

The success of their first products in Germany and Europe prompted them in late 2004 to move operations to the USA, to be able to serve the American market as well as all other English speaking countries such as Australia, UK and South Africa from one central location. Their business has grown to a full-fledged international corporation with an office in Las Vegas and a full line of innovative products as well as distributors and installation partners all over the globe.

Being highly specialized in the development and distribution of aftermarket roof- and comfort controllers since 2002 allows them to offer an unsurpassed level of competence and product quality. Their main goal is optimization of each individual product to a maximum in compatibility, usability and intuitive operation. They put greatest effort into development and quality checks of all their products to achieve this goal and meet all expectations of their customers.

The extraordinary success of their products is also based on the great communication with their customers, which usually already starts for each new product during the development and prototyping phase.
