

Mods4cars announces 7 new SmartTOP roof controllers

Mods4cars is announcing 7 new SmartTOP roof modules for the 2011 convertible season. The manufacturer reports that after-market roof controllers for the BMW 6 Convertible (F12), Mercedes Benz SLK (R172), Nissan 370Z Roadster, Renault Megane CC (III), Renault Wind, VW EOS (Facelift) and VW Golf VI Convertible will be available this year.

Ocean, New Jersey – March 14th, 2011

Mods4cars is announcing new convertible roof controllers for 7 cars. After-market SmartTOP modules for the BMW 6 Convertible (F12), the Mercedes Benz SLK (R172), and the Nissan 370Z Roadster will be available this year. Products for the French convertibles Renault Megane CC (III) and the Renault Wind will also be available this season. Mods4cars will also produce roof controllers for the German VW EOS (Facelift) and the new VW Golf VI Convertible in 2011.

All the new models will feature the SmartTOP's two most important functions. Firstly, the One-Touch system allows the roof to be opened while driving; the roof can be operated up to a speed of about 40 km/h. All it takes is a quick push of a button inside the cabin, thereby eliminating the inconvenience of having to press and hold the roof button. Secondly, the roof can be controlled from a distance using the car's existing remote fob without having to change or reprogram the original car key.

"Depending on the module, additional features can be added to these two main functions," states PR representative Sven Tornow. He continues: "All the modules also feature a practical USB connector that permits our customers to comfortably download unlimited free software updates on their home computer."

The new SmartTOP after-market roof controllers will start at 249 Euros + tax.

Modules for the following models are now available for purchase: Alfa, Audi, Bentley, BMW, Ferrari, Ford, Infiniti, Mazda, Mercedes, Mini, Opel, Peugeot, Porsche, Renault, Volkswagen and Volvo.

About Mods4cars:

Mods4cars was founded in 2002 with the idea to add a highly demanded feature to the otherwise almost perfect Porsche Boxster: Comfort One-Touch roof operation while driving at slow speeds. The resulting product offered not only that, but also allowed quick and easy installation by just swapping out a relay box, thus leaving no traces and no permanent changes on the vehicle. The first SmartTOP roof controller was born.

The success of their first products in Germany and Europe prompted them in late 2004 to move operations to the USA, to be able to serve the American market as well as all other English speaking countries such as Australia, UK and South Africa from one central location. Their business has grown to a full-fledged international corporation with an office in California and a full line of innovative products as well as distributors and installation partners all over the globe.

Being highly specialized in the development and distribution of aftermarket roof- and comfort controllers since 2002 allows them to offer an unsurpassed level of competence and product quality. Their main goal is optimization of each individual product to a maximum in compatibility, usability and intuitive operation. They put greatest effort into development and quality checks of all their products to achieve this goal and meet all expectations of their customers.

The extraordinary success of their products is also based on the great communication with their customers, which usually already starts for each new product during the development and prototyping phase.
