

SmartTV by Mods4cars: TV-in-motion module for Bentley

The aftermarket video-in-motion unlocker SmartTV offered by Mods4cars is now available for all modern Bentley models. It allows passengers to enjoy multimedia playback on the front screen while the car is in motion. The hardware based video-in-motion unlock can be quickly enabled or disabled on demand.

Las Vegas, Nevada – April 6th, 2012

The video-in-motion unlocker offered by aftermarket electronics specialist Mods4cars under the name SmartTV is now available for all Bentley models with CAN bus technology. It gives passengers the freedom to enjoy multimedia content and operate the front screen while the car is moving. It can easily be enabled or disabled on the fly.

“Our professionally designed SmartTV module is a permanent solution.” says PR manager Sven Tornow. Since it is a hardware module, it will continue to work even after system software updates done by the dealer during service or routine inspection. “We are happy to offer Bentley owners a second add-on module after the Bentley convertible top module SmartTOP has been available for some time.” Sven Tornow concludes.

Mods4cars has been in the aftermarket business for 10 years, mainly with top and convenience add-on modules for almost all convertible and roadster models. SmartTOP modules allow use of the top while driving as well as top operation via the original key fob remote. Each module also offers a set of bonus features.

Every module comes with a standard USB port for firmware updates and quick and simple configuration through a Windows software program. Updates and software are available free of charge online.

The SmartTV module is designed for and compatible with all Bentley models using modern CAN bus technology.

Similar modules are available for BMW, Mercedes-Benz, Skoda and Volkswagen.

SmartTOP add-on kits are available for Alfa, Audi, Bentley, BMW, Ferrari, Ford, Infiniti, Mazda, Mercedes, Mini, Nissan, Opel, Peugeot, Porsche, Renault, Volkswagen and Volvo.

The SmartTV module for Bentley is available for 149 Euros + tax.

About Mods4cars:

Mods4cars was founded in 2002 with the idea to add a highly demanded feature to the otherwise almost perfect Porsche Boxster: Comfort One-Touch roof operation while driving at slow speeds. The resulting product offered not only that, but also allowed quick and easy installation by just swapping out a relay box, thus leaving no traces and no permanent changes on the vehicle. The first SmartTOP roof controller was born.

The success of their first products in Germany and Europe prompted them in late 2004 to move operations to the USA, to be able to serve the American market as well as all other English speaking countries such as Australia, UK and South Africa from one central location. Their business has grown to a full-fledged international corporation with an office in Las Vegas and a full line of innovative products as well as distributors and installation partners all over the globe.

Being highly specialized in the development and distribution of aftermarket roof- and comfort controllers since 2002 allows them to offer an unsurpassed level of competence and product quality. Their main goal is optimization of each individual product to a maximum in compatibility, usability and intuitive operation. They put greatest effort into development and quality checks of all their products to achieve this goal and meet all expectations of their customers.

The extraordinary success of their products is also based on the great communication with their customers, which usually already starts for each new product during the development and prototyping phase.
