

## **Universal Comfort-Controller for Porsche Carrera Coupe, Cayman and Boxster by Mods4cars**

*World Premiere: Aftermarket comfort control add-on maker Mods4cars today announces availability of its new controller chip for the Porsche Carrera, Cayman and Boxster which allows dropping and raising the windows with the factory remote among other things.*

**Ocean, NJ – June 22nd, 2010**

Common features of the new RemoteKEY module offered by the US based company are raising and lowering the windows from afar with the factory remote, an audible confirmation when locking the car, the mirror park assist dipping down the passenger mirror in reverse gear as well as the ability to open and close the Porsche Boxster top when moving very slowly or when halted.

“This time we offer an universal controller suitable for the Porsche Carrera Coupe, Porsche Cayman and Porsche Boxster, which offer a great additional comfort” says Mr. Tornow, the company’s PR-Manager. Having modules for Alfa, Audi, Bentley, BMW, Ferrari, Ford, Mazda, Mercedes Benz, Mini, Opel (Vauxhall), Peugeot, Porsche, Skoda, Volvo and VW, Mods4cars covers many popular auto brands.

With the addition of the brand new RemoteKEY module for the Porsche Carrera, Cayman and Boxster, Mods4cars offers even more drivers the opportunity to upgrade their cars with a comfort controller; a convenience that once experienced, is hard to live without.

## **About Mods4cars:**

Mods4cars was founded in 2002 with the idea to add a highly demanded feature to the otherwise almost perfect Porsche Boxster: Comfort One-Touch roof operation while driving at slow speeds. The resulting product offered not only that, but also allowed quick and easy installation by just swapping out a relay box, thus leaving no traces and no permanent changes on the vehicle. The first SmartTOP roof controller was born.

The success of their first products in Germany and Europe prompted them in late 2004 to move operations to the USA, to be able to serve the American market as well as all other English speaking countries such as Australia, UK and South Africa from one central location. Their business has grown to a full fledged international corporation with an office in California and a full line of innovative products as well as distributors and installation partners all over the globe.

Being highly specialized in the development and distribution of after market roof- and comfort controllers since 2002 allows them to offer an unsurpassed level of competence and product quality. Their main goal is optimization of each individual product to a maximum in compatibility, usability and intuitive operation. They put greatest effort into development and quality checks of all their products to achieve this goal and meet all expectations of their customers.

The extraordinary success of their products is also based on the great communication with their customers, which usually already starts for each new product during the development and prototyping phase.
